The cross tabulations found in this report are presented in a “banner table” format. Categories of respondents (e.g. “35-54 years old,” or “Female”) are listed across the top of each page (the “banner”). The questions asked in the survey are listed down the left margin. The figures in the cells are percentages based on the number of respondents in the category at the head of each.

- 2** As you may know, the annual session of the Legislature begins in a couple of weeks. In your personal opinion, what are the most important issues the Legislature should focus on during this session? [OPEN-ENDED. Full table on p.4]

3 The following are some issues the legislature is expected to address in the coming session. First, Washington has a new capital gains tax and a carbon pricing and cap-and-trade system. These two programs, plus other taxes, have added more than one billion dollars to state revenue – more money than expected. As a result, the legislature will decide what to do with this budget surplus. In your opinion what would be the best response to :

ROTATE

- 55** Put more money into schools, reducing homelessness, mental health programs, and combating the effects of climate change.
- 7** Keep spending at the current level and put the additional money into the reserves, even if that means cuts in some programs.
- 30** Keep spending at the current level and use any additional money to reduce taxes, even if that means cuts in some programs
- 7** NO OPINION

4 The following are some proposals that the legislature is expected to discuss in the coming weeks. As I read each of these items, please indicate whether you Favor, Strongly Favor, Oppose or Strongly oppose each one. The first item is...

	SF	FAV	OPP	SO _p	DK
A Repeal the state’s new capital gains tax.	40	17	12	17	15
B Eliminate some restrictions on when police can pursue criminal suspects in cars.	41	25	12	13	9
C Put more money into mental health programs and funding to curb opioid use.	43	41	6	6	4
D Put more money into housing and other programs to address homelessness.	39	27	14	14	5
E Give parents authority to review public school textbooks, student discipline and health records and to opt their kids out of sex education.	41	19	15	16	9
F Give rebates on utility bills for lower income households.	37	38	13	7	6

5 The State Public Disclosure law says that state agency documents, including emails, should be available to the public. The State Legislature, claiming legislative privilege, says emails, texts and other communications to and from legislators are exempt from the disclosure law and are not required to be made public. However, the State Supreme Court has ruled that legislators are subject to the public records act. As you see it, should state lawmakers:

- 9** Be exempt from public disclosure laws
- 82** Comply with public disclosure laws
- 8** No Opinion

6 The next questions are about Governor Jay Inslee [INS-lee]. Overall, how would you rate the job Mr. Inslee is doing as Governor? Would you say...

8 There are currently four candidates who have announced their intention to run for Governor. The election is almost a year away, but For each candidate, indicate – as things stand today – whether you: 1) Intend to vote for him; 2) Could vote for him; or 3) Will not vote for him for Governor. If you are not familiar with the candidate, just indicate that. The first on is...

C Democrat Mark Mullet	2	21	24	20	32
D Republican Semi Bird	3	14	36	13	33

9 There will also be elections for State Legislature. You will be asked to vote for two state representatives and perhaps a state senator, depending on your district. As things stand today, in the races for the state legislature in your District, are you likely to vote for:

ROTATE TOP/BOTTOM

READING THE CROSSTABULATION TABLES

The crosstabulations found in this report are presented in a "banner table" format. Categories of respondents (e.g. "35-54 years old," or "Female") are listed across the top of each page (the "banner"). The questions asked in the survey are listed down the left margin. The figures in the cells are the number who gave an answer and the percentage based on the number of respondents in the category at the head of the column (e.g., women).
